# WHERE TOMORROW DEVELOPS

Top organizations engage Exelaration to design and build custom software that takes their business to the next level. Anchored by expert Agile technologists with decades of experience across a variety of tech stacks, our development teams deliver sophisticated software solutions. Plus, Exelaration's innovative model gives clients the added opportunity to benefit from our proven "audition-to-hire" process for entry-level software engineers.

Exelaration has delivered solutions for start-ups, Fortune 500 companies, federal agencies, non-profits, and associations. Our clients unanimously cite our performance and capabilities as the reason they engage and re-engage us as their preferred technology partner, Agile advisor, and even fractional CTO.

Our clients include:

- Peace Corps
- Compressed Gas Association
- George Washington University
- ArchiveCore
- Ovarian Cancer Research Alliance
- CustomInk
- Nuclear Threat Initiative
- BEAM Diagnostics
- ICAgile
- KlariVis

How does Exelaration consistently produce state-of-the-art solutions on-time and on-budget? We're powered by proven best practices from the world of scientific, university-based research. Our innovative mentor-led model harnesses the experience of expert engineers coupled with the value of talented emerging technologists.

Over a 4.0 client satisfaction grade point average

Up to 80% reduction in longterm maintenance costs

35% cost savings compared to traditional software development resources

WHAT WE DO

SOFTWARE MODERNIZATION
We use cutting-edge technologies and best practices to replace antiquated systems with more efficient, user-friendly, and lower maintenance solutions.

ENTERPRISE APPLICATIONS
Exelaration's team designs enterprise applications to meet your requirements and simplify your critical business processes and functions.

ECOMMERCE APPLICATIONS
We give businesses a leg up on the competition by delivering elegant and engaging ecommerce solutions optimized for your customers' needs.

MOBILE APPLICATIONS
We understand what it takes to build solutions that need to work and deploy elegantly in native, browser, and mobile environments.

THIRD-PARTY INTEGRATIONS
Our clients commonly engage Exelaration to replace third-party apps and to build interfaces to and from them.

MVP DEVELOPMENT FOR STARTUPS
Entrepreneurs use Exelaration to serve as fractional CTO and to develop an MVP or proof-of-concept for their game-changing product.

DEVOPS
Our teams bring mature DevOps practices and environments to clients through infrastructure-as-code and CI/CD (continuous integration/continuous delivery).

AGILE SOLUTIONS
Every Exelaration project is built using Agile and Scrum best practices. Curious about Agile for your own team? We can introduce these practices to you as well.

We're comfortable working as a turnkey IT provider, or as a tightly integrated component of your team. Exelaration plugs in wherever you need us:
